

Avani Times

A brief insight into the recent happenings at Avani Technology Solutions

Making Our Presence Felt

Cracking the Rochester Top 100 and Inc. 5000

Though we are not the ones to sit around boasting about our accomplishments, we would like to at the very least mention them. After all, it did take us years of efforts and consistent performances to reach where we stand today. And we do have two such major accomplishments to mention this time around. So do bear with us this one time, where we would like to just for a few moments sit back and bask in the glory of what we have achieved so far.

Rochester Top 100

To start off with, Rochester, which off late has made a name for itself as a region of growing innovation and entrepreneurial spirits is also home to the Rochester Business Alliance. An alliance that looks to promote and recognise the fastest-growing privately owned companies in the Greater Rochester Region. And making a place for ourselves into the 'Rochester Top 100' was an honorary surprise and most of us were pleasantly caught unawares by it. It is a nice feeling to have, the feeling that follows being recognised for your feats and progress, not only your clients but also your local business alliances. And we certainly don't mind an occasional exposure to such surprises and feelings.

Inc. 5000

Moving on, from local business alliances to an alliance that covers an entire country! Better still, even this alliance is into promoting and ranking the fastest-growing private companies across America. Yes, we are talking about the ever coveted list of 'Inc.5000' by Inc. And boy does it feel nice to be a part of the coveted list. Now that we ponder over it, the term 'fastest-growing' does have a nice ring to it and something that we can get used to given our consistency. If anything, such instances just act as an added incentive to make us strive even harder in pushing the benchmark higher. Here's looking forward to the next step along the path to our continual progress- 'Inc. #500'!

Spreading Our Wings

From Trainings to Procurements, We have it all

Now that we are done with the few moments of basking in a couple of our accomplishments (along with making you bear with us through it, our apologies for it, we are grateful to have such patient clients and associates such as you); let us get you up close to what Avani Technology Solutions has been upto off late.

On a special request, we will soon be partnering up with a couple of state universities to offer skill trainings to fresh graduates. The specialized trainings will be offered to graduates from the CSE (Computer Science Engineering) department. The trainings will follow a well-structured syllabus and will be based on real time scenarios. The core agenda behind the programmes is to make the fresh pass outs more in-sync and tuned to the workings of the technological markets of this age. This marks our first such assignment and we are putting our best foot forward for the same.

Notable Ongoing Assignments

Consistent Progress One Step at a Time

We are pleased to announce that Avani Technology Solutions is at the moment in the process of building a state-of-the-art training facility centre and is scheduled to open shortly. This centre will act as the focal point for all the candidates procured by Avani to converge and enhance their respective technical skills further. We have also empanelled with us seasoned market veterans across various technologies to facilitate these trainings. Another step towards maintaining the trust and quality that our clients have come to expect from us.
