

SAP BI/BW Solutions

Business Scenario

Client needed a flexible reporting and analysis tool to extract and deliver valuable business information quickly. The client needed a solution that delivers results with faster ROI by utilizing best practices for business analysis. The client wanted a lower cost of ownership and more visibility by providing access to information across all business areas. So they were selected SAP BW as the platform for its Decision Support System.

Benefits of BI Solutions

SAP BI is a component of SAP's Net Weaver called Business Intelligence. It has a platform and tool set that allow companies to have power over their results. Its data warehousing features allow you to improve how your business is run by means of storing the company's data electronically. A data warehouse basically is an electronic allocation of some or all of the company's data, keeping reports and an analysis of the company in an organized manner.

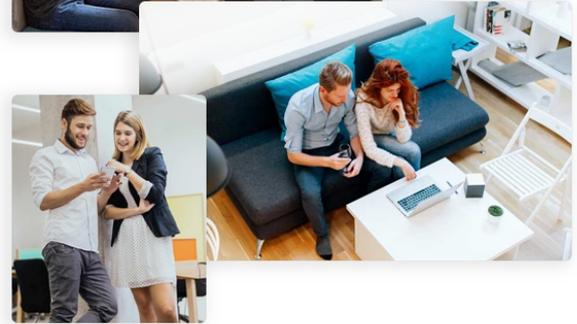

- 👍 Immediate, single-point access to all relevant information regardless of the source
- 👍 Coverage of entire business process
- 👍 High quality information
- 👍 Sophisticated decision support
- 👍 Shorter implementation time with fewer resources
- 👍 The ability to information from large amount of operational and historical data

Solutions Delivered

- 👍 SAP BI is one of the most powerful and extensive OLAP database solutions in the market.
- 👍 The Avani team took the performance management strategy to the next level by actuating and profiling the entire business via SAP BI to our leading clients.
- 👍 Our client's core team can then map the entire business against the planned strategy and track it against the benchmarks set.
- 👍 We have enabled integrated reporting across all domains, including sales, finance, inventory, HR and CRM.
- 👍 We have catered to the reporting needs of users at different levels of organization with proper security implemented alongside to prevent data leakage and pilfering.
- 👍 The solutions implemented include dynamic performance dashboard for business leaders, as well as reporting on a daily, weekly, monthly and quarterly basis for various comparative and analysis needs
- 👍 We provide integration and distribution of the reports to users mailboxes and to mobile handsets.

Project Benefits

- 👍 Standardised reports that are easy to access, easy to understand and globally consistent in their look and feel across all Dyno Nobel Sites.
- 👍 Reports are accessed via SAP portal from across the world
- 👍 Each report offers the functionality for 'slice, dice & drilldown' capabilities
- 👍 Reports are scheduled to email users at specific times
- 👍 End users benefit from significantly reduced query response time by BW Accelerator
- 👍 Web based planning with the help of planning applications to produce a group-wide strategic business plan.

Why Avani

Avani's data warehousing practice can help release the locked potential in your organization's data to support quick and effective decision making.

We offer complete end-to-end data warehousing and business intelligence services, including on-site business / technical needs assessment, development and integration services and partial or total outsourcing of application implementation and maintenance.

We also offer additional services in the data warehousing / business intelligence area.
